

Manifesto

My name is Anthonia. I am running for this role as I believe that I am a strong communicator who has the best interests of the students of this college and people around me at large. Listed below are a few actions I wish to fulfil during my tenure if I am elected.

- Strengthen the voices of liberation leaders so students at the college will be more comfortable talking to us with whatever problem they have and can trust us to do our best to solve the problem I will do this by making more one-to-one sessions available for liberation leaders and creating the suitable platforms for students to express their needs and complaints.
- Introduce workshops and campaigns focused on unconscious bias, cultural sensitivity, and mental health awareness by creating a more inclusive campus where everyone is accepted independent of where their background, hence creating a mutual understanding.
- Committed to making Dudley College at large more inclusive and supportive by using feedback from forums and questionnaires to create more accommodating policies to address discrimination and hate against BAME students, students of the LGBTQ community, disabled students so that they can feel safe and comfortable with their culture and in their skin on campus.

Thank you for reading up to this point and I promise to reach all the above goals during my tenure. I hope I am considered worthy for this position and I hope you vote for me.
