

Manifesto-

I to be the Assistant President of Union Development because I care about helping our union grow and work better for everyone. I believe in teamwork and want to make sure every member feels heard and supported.

I have experience in working with groups and will do my best to listen to our members and make positive changes that benefit us all.

Mentorship Program: Establish a mentorship program that pairs experienced students with newcomers or those needing support. This program can help new students acclimate to campus life, provide guidance on academic challenges, and create a sense of community. It encourages personal growth while fostering strong relationships among students.

Feedback and Suggestion Forum: Create a regular feedback and suggestion forum where students can voice their ideas and concerns directly. This can be done through monthly meetings or an online platform. Actively listening to student input and addressing issues will empower them and ensure their needs are met, leading to a more engaged and satisfied student body.
