

# Manifesto

## **Mirabel- Manifesto**

As the newly appointed Deputy President for Enrichment & Citizenship, my focus is to help create a college environment where every student feels involved, supported, and empowered to make the most of their college experience. My goal is to work closely with students, staff, and the Student Union team to ensure that enrichment, community involvement, and student well-being remain at the centre of our college culture.

With my recent appointment as Deputy President for Enrichment and Citizenship, I aim to contribute to making college a community where all students feel engaged, supported, and inspired to make the most out of their college life. I aim to work with students, college staff, and the Student Union Team to make college values of enrichment, community, and support a prominent part of our college community.

### **1 Increasing Enrichment Activities**

I hope to increase the number of clubs, events, workshops, and activities offered to students. Enrichment needs to be accessible, inclusive, and cater for a wide range of interests in our college. I plan to help set up activities as well as new ideas from students to flourish by providing a platform for them to succeed.

### **2 Increasing Awareness and Participation**

Too many students are missing out simply because they are not aware of what is available. Another area I would like to improve as a priority would be communication between the Student Union and students, with a focus on spreading news, events, and opportunities as effectively as I can. Every student should feel informed and inspired to take part.

### **3 Citizenship and Values of Community**

Citizenship plays a significant role in fostering a college community that values respect and connection. I will support activities and campaigns that aim to promote inclusion, kindness, respect, leadership, and social responsibility. This will range from supporting volunteer activities, charity events, to initiatives that help students increase their confidence to make a positive impact in college.

### **4 Supporting Student Well-being**

Student well-being shapes every part of the college experience. I plan to work with staff and Union leaders to promote awareness of well-being services, ensure students feel comfortable seeking support, and help create a culture where mental health and personal challenges are understood rather than overlooked.

### **5 Listening to Students**

I would, in this role, make it a point to always remain accessible to all students, and I would also be receptive to all their thoughts, ideas, and concerns. Being a representation of students means that I would not only voice their concerns but also that I would take their voices into consideration.

As the Deputy President for Enrichment and Citizenship, I promise to undertake my duties with passion, honesty, and understanding. I look forward to being part of a positive, inspirational, and interesting environment where every student can develop and feel a sense of belonging.
