

## Manifesto:

In this role I will strive to make sure students feel safe to express themselves freely in college by opening difficult conversations and breaking down stigma around those topics that students are scared to have on their own.

I want to open the conversations around STIs and sexual health to educate them on safety and all the stigmas around it.

I want to discuss problems faced by our LGBTQ+ students especially our trans individuals.

And finally, I will continue our efforts to tackle racism and racial bias in college.

College is somewhere all should feel safe and protected. College is a safe space for many and I will make it stay that way.
