

MANIFESTO.

Students are the sole heart of every college therefore putting their needs first is the best and beneficial. As a second-year student at this noble college, I have witnessed a lot of things that bother students and I would like to bring them to the notice of the college authorities, be it financial, educational or emotional support, I am willing to make myself available for students and be down to earth to make them feel comfortable.

Why choose me?

The experience and concerns of students will guide every decision I make.

I will liaise with the management of the college to enhance the quality of student life.

The daily experiences of students on campus matter. I will work to improve the essential services that impact the well being of students. I understand the college provides many students with lots of essential resources. There are other things that most students need that would help their daily activities. Good things take time; therefore, I will make sure these important things that students need are brought to the college authorities on time for urgent solution and attention.

I wish to promise that I will address students' grievances promptly when the concerns arise. Although there is a counselling body that see to the welfare of students, I have been justifiably attracted by the large number of students who find it difficult to visit the counselling unit because they feel shy. As their colleague, I will therefore make myself available so that they feel free to share their problems with me. Together with my colleagues, we shall work to make life comfortable on campus.

I will advocate for more fun but educational activities like scribbles. I am of the view that, educational games, if properly implemented in the college, will encourage students' attendance. And secondly make learning attractive to students. This will also help students have more focus on their studies.

Finally, becoming a vice president of the college is not just a position to lord over you but a privilege to serve my colleague students and school authorities. We shall share common dreams and challenges. I know what it is like to be heard, to face difficulties and to wish for a community that genuinely care. That is why I am here to be your voice, your advocate and your partner in building a better student experience for everyone. You can trust me that based on where I am coming from, we are going to work together to elevate academic excellence.
